PROFILE

I am a motivated programmer and data engineering trainee with hands-on experience in Python, SQL, and full-stack development. I recently graduated from the 8200 Kodcode Military Academy (March–September 2025) with a strong foundation in data structures, RDBMS, NoSQL, data pipelines, and DevOps tools. I am skilled at building and deploying modern applications, managing containerized environments, and designing scalable data workflows.

I am fluent in Hebrew (native), English (professional), and German (intermediate). I am passionate about problem-solving, data systems, and continuous learning.

EXPERIENCE

❖ Developer, Israel's Ministry of Defence

Mar 2025 — Present

Tel Aviv

Working in a small team of developers, we fulfill the ministry's needs in the military sector, covering both the DevOps and fullstack zones.

Work is classified.

EDUCATION

❖ CS50

Sep 2024 — Present

I have taken numerous courses in Computer Science, Web Programming, SQL, Cybersecurity, and other related fields.

Through these courses, I have gained extensive experience and practical hands-on work.

❖ Udemy

Sep 2024 — Present

I've been taking courses on Udemy in various subjects, including Python, Fullstack, React, Angular, Docker, Kubernetes, Openshift, Kafka, Airflow, and C#.

I've gained a lot of knowledge and continue to learn and educate myself.

❖ KodCode Civil & Military Academies

Sep 2024 — Sep 2025

Jerusalem, Tel Aviv

I completed an intensive program in data engineering and DevOps. Throughout the program, I gained practical experience in data engineering, data applications, modeling, databases, and various other data-related topics.

Additionally, I learned about continuous integration and continuous deployment (CI/CD), multi-container systems, orchestration, and cloud deployment.

SKILLS

Web Development	Experienced	User Experience	Skillful
Data Engineering	Experienced	Responsive Design	Beginner
Application Deployment	Beginner	Collaborative Environment	Experienced
